# CONCEALMENT COVERS

Lightweight, versatile material and patented signature management materials that mitigate soldiers' and military assets' signatures against advanced infrared (IR) sensing technologies.

**ZIRO**  
MITIGATION TECHNOLOGY

Our standardized linking system across every size allows multiple covers to be connected, letting Soldiers expand the size and shape of the system to match any operational footprint.

The compact, lightweight, and modular design of Stealth Concealment Covers enhances operational utility—easy to transport, deploy, and connect to form larger nets as needed.

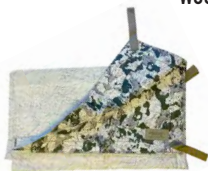

Reversible camouflage design allows for expanded use across multiple AORs. Additional camouflage patterns are available.

22X22 CONCEALMENT COVER  
NSN # 8340-01-719-5044 | WOODLAND/DESERT

# INDIVIDUAL CONCEALMENT COVER

- Reversible Camouflage Pattern
- Adjustable Hood that can be fitted to soldiers wearing helmets or other covers. The hood also offers both full and 3/4 face cover options that doesn't impact users' vision but helps reduce the heat signature of their head and face.
- Lightweight, Breathable Fabric: Designed to prevent overheating and adjust to ambient air temperature.
- Strategic Heat Absorption: Heat-absorptive material is placed in typical hotspot areas (chest, shoulders, head, and back) for enhanced thermal protection.)
- Scalable System: Multiple covers can be connected to form a larger hide site or provide overhead protection.
- Compact and Stowable: Designed for easy packing and storage.

**DIMENSIONS:** 67" x 103"

**WEIGHT:** 2 lbs

## PROTECTION CAPABILITIES:

- VIS (Visible Light)
- NIR (Near-Infrared)
- MWIR (Mid-Wave Infrared)
- LWIR (Long-Wave Infrared)

# PATROL LINER

NSN's

STEALTH PATROL LINER

8340-01-719-4173 (OCP)

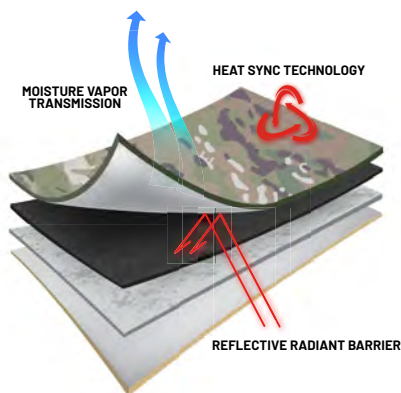

8340-01-719-5841 (WLD)

Featuring Graybody™ Technology, the Patrol Liner helps manage thermal signatures while providing an expanded comfort range. Its Heat Memory Technology works to retain warmth when temperatures drop, while the water-repellent coating sheds light moisture to keep you focused on the mission.

Built with thermal management and IR-mitigating capabilities, the Patrol Liner is designed to support signature neutrality without sacrificing comfort or mobility.

## FEATURES:

- 64" x 93" coverage
- Increased comfortability range
- Graybody™ Technology
- Thermal Management & IR Mitigation
- Signature Neutrality
- Heat Memory Technology
- Water-Repellent Coating
- Proudly Made in the USA

INCREASED COMFORTABILITY RANGE

# SLEEP SYSTEM

NSN's  
STEALTH ALL SEASON SLEEP SHELTER SYSTEM  
8465-01-719-4350

Forward-facing ventilation = airflow when you need it

Waterproof Bivy Cover with removeable  
Delrin pole = 16" headspace

Dual zippered Cold Weather Mummy Bag

Quilted Patrol Liner w/ foot pocket

- Packs small, weighs just 6.2 lbs
- T-Extreme rated to -55°F
- 4-season capable. Built for any environment
- Packed Dimensions : 15" x 10" x 8"
- Overall Length: 85"
- Overall Width: 35"

# ISV CONCEALMENT COVER

- Reversible camouflage patterns for adaptable concealment across varying environments.
- Roof-mounted design allows for rapid vehicle caching and fast recovery after mission completion.
- Multi-spectrum signature management mitigates VIS, NIR, MWIR, and LWIR signatures without interfering with RF or communication systems.
- Compact and stowable for efficient storage in unit supply areas after training or operational use.
- Dimensions: 30 ft × 20 ft
- Weight: 30 lbs
